

A summer conference...

A festival...

360° Exploring Community an Initiative Conference

one week of
making sense!

happening July 11th-17th 2009

5 days of lectures, workshops and concerts, 1 day of joint action. Hosted in Ytterjärna, Sweden, home of the Youth Initiative Program.

Register today, and you can start planning how to get here. And prepare to let go. Community is a space where individuals can express themselves, and a place where new ideas can emerge.

The week will be packed with an abundance of activities to choose from. Swedish summer days are long, so you can join in on activities from the early morning until late in the evening. Lectures, workshops and evening performances, all given by a blend of prominent international experts and local change-makers.

As the conference is happening in the middle of the summer, we have provided space to put up tents close to the Conference Grounds.

We'll create community, and look at how it manifests in the world. Through listening to community-builders, both physically and through human interaction. Through putting our hands in the soil and harvesting our own food. Through sharing a shiver when we're all dancing to the same music.

And here's the challenge we've set out for you: find your way to the 360° Conference (or back) in any low-impact way you can think of. You can hike, bike, rail or sail; or why not hitch-hike? All of the efforts will be displayed during the conference, and the best responses to our GreenChallenge will be rewarded.
